# Token Distribution

## Allocation of funds

Total token supply - 10,000,000,000

FLDB will be a defi-driven and autonomous DAO designed to act as an unprecedented decentralized and extensive freelance platform. It not only provides the best experience B2B (business-to-business) but also pays attention to P2P (peer-to-peer) interaction with its intuitive user interface, it can match skilled freelancers to post global recruitment information, all low level commission fee trading. It brings a new innovative model to ensure professional mediation to ensure the best quality for both employers and employees work.

The open market gives us an unreliable experience and leaves us with a different experience freelance work/employer and workforce not suitable for employer work. This gave promote a huge sell-off between the subcontracting model and the middleman pay more for this job than it deserves. This scene brings a lot of distrust and doubt, adjust close to ideal results for employers, rather than convenient/satisfactory salary for employees.

Improved technology, the Internet, multinational companies, etc. "Globalization". But our human instincts blinded us to use this great blessing to take advantage of each available human resources, regardless of distance. As a result, today's unemployment problem has been solved and other similar synonyms-underemployment and overemployment, leaving all shares the holder is completely dissatisfied with the game. More and more need to solve and solve this problem.

Here, FLDB is the only solution that has never been imagined, and it is truly free for the first time in history.

FLDB coin will bring game-changing strategies among freelancers to bring accurate matches Employers-employees bring them into a tighter range. This ensures that "the right person the right job, the right salary" makes the "demand-supply" curve meaningful in terms of quantity and quality. Here, this platform also accommodates all kinds of players on the open market today.

At present, the existing platforms are trying to decentralize, and the result is only in The "niche" part of the market. And those who cross the "broader" part of the market are forced to concentrated. FLDB is bridging this gap by using blockchain to create a new dawn technology.

B2B-Business-to-business interaction involves various professionals at all levels. Ensure a successful contract cycle from drafting the memorandum of understanding to payment transaction. The same professional environment is not suitable for independent P2P-peer-to-peer games, the unpleasant and frustrating experience of freelancers who gave way there.

FLDB-truly freelance freelancers develop reliable governance with zero manpower. Use current state-of-the-art technology for interference. This can provide a greater feeling. The security of each stakeholder, including B2B and P2P in essence, runs through the entire game until they meet their need.

## Employers

It can be a company or an individual who visits the FLDB platform to find an employee best suited to the task/work required.

## Responsibilities

- Post task/work/project requirements and schedule.
- Choose suitable employees based on skills, reputation level, and bid amount,
- Timetable for the execution of designated work and payment methods.
- Payment In the event of an arbitration request, the decision of the arbitrator shall be followed.

## Employees

- Selects an appropriate assignment/job/project published by the employer.
- Should do the work assigned to him, both quantitatively and qualitatively within the framework specific time frames.
- Submission of work
- If, after the arbitration request has been made, he/she should abide by the Arbitrator's decision.
